

Utility Page Description

This page explain the **Utility Page Template**.

Namespace Creation

Each utility must have its own namespace. As an example **ff3:ff3us:util:ff3usme** is one. Put there the files that can be downloaded. If you add screenshots, you can put them in **ff3:ff3us:util:ff3usme:screenshots** for Gallery purpose. Other sub-namespaces are fine too if it keep thing ordered.

For FF6 Advance, create your utility namespace in **ff6a:utils** and for General ROM hacking in **rh:util**.

Creating a Page

Open the template page you need and in the **page id** textbox enter the wanted utility name which will become part of the namespace (such as ff3usme in ff3:ff3us:util:ff3usme). Click on the red link in yellow box after to edit your new page.

The FF3us / FF6j utility template page is available [here](#).

The FF6 Advance utility template page is available [here](#).

The ROM Hacking utility template page is available [here](#).

When your new page is opened and ready to be edited, remove the first section on top of page. It is similar to this but will differ a bit depending of which template you use. However it's always the first 5 lines:

```
<WRAP group>
<WRAP column leftalign>
~~OpenAS>rh:util:SAVEAS_PAGE#pagetemplates:utility-rh~~
</WRAP>
</WRAP>
```

Demo Page Explanation

Header

Notice: Any WRAP tag such as **<WRAP group>**, **<WRAP column>** or **</WRAP>** must not be removed from the template.

1) ~~**NOTOC**~~ at top of page is required for no table of content.

2) ===== **utility name here** ===== is replaced by the utility name. As an example ===== **FF3usME** =====.

Description

Put anything you want here, as long as it is relevant.

Links

Links like author's website, old versions, file(s) required, tutorials, etc.

Gallery

if you use the gallery plugin, a syntax example would be

gallery>ff3:ff3us:util:ff3usme?260x200&lightbox. Alternatively the

ff3:ff3us:util:ff3usme:gallery or **ff3:ff3us:util:ff3usme:screenshots** namespaces could be an option. See the [Gallery documentation](#) for more info. Alternatively you can also display individual images if you want.
